Introduction

Blockchain is usually a Public and distributed network which enables the secure transfer of assets without intermediary.

Anything can be tokenized and exchanged on a blockchain network.

The first blockchain called Bitcoin has been created in 2009.

It's a secure and decentralized cryptocurrency.

Bitcoins are also fungible; it means that each bitcoin is equal in value to every other bitcoin.

But NFTs on other hand are non-fungible; which means each token represents a thing of singular value.

NFT or a non-fungible token, is a unique token recorded in a blockchain that represents ownership of a digital or physical asset.

NFTs span a range of unique assets including but not limited to collectibles, videos, birth and death certificates and much more.

People often use NFT Marketplaces (usually online platforms) to create buy and sell NFTs.

Mono NFT Marketplace

An NFT marketplace is a platform that makes it simple to create, buy and sell NFTs.

Using NFT Marketplaces should be easy and straightforward.

MonoNFT.net is an NFT Marketplace with a focus on simplicity and Variety of the supported Blockchains.

Currently there are 8 blockchains supported including Avalanche C-Chain, BNB Smart Chain, Celo, Cronos, EthereumClassic, Fantom Opera, HECO and Polygon

We are also planning to add more networks on near future.

Key Features:

- * Multiple Blockchains Supported.
- * Sell using Native currency of each Blockchain.
- * Zero Fees on NFT Trading.
- * Low fees on NFT Minting because of the Optimized Contracts.
- * Support for more than 60 Cryptocurrency Wallets.
- * ERC721 and ERC1155 Support.
- * Mint Multiple NFTs at once to reduce Gas fee.
- * Use of Well Known and Audited Contracts From Thirdweb.
- * Easy to use interface.
- * Author Profiles.

MonoNFT (ONFT)

MonoNFT (ONFT) is the Mono NFT Marketplace Token with a Total supply of 25,000,000 Units.

It's only available on BNB Smart Chain for starter.

ONFT Token can be used for NFT Promotions and Special Listings on MonoNFT Marketplace.

It can also be used to add a new blockchain or token support to the Marketplace.

There is a 2% Fee on all ONFT Transactions, 1% of each transaction will be distributed between the Holders as an Automated Staking Mechanism to encourage holding and 1% of each transaction will be added to the Pancakeswap V2 Liquidity pool to enhance the price stability.

ONFT Token Initial Distribution:

6M is allocated to the Listings/Promotions

6M is allocated to the Exchanges Liquidity

5M is allocated to the project development

3M is allocated to the Founders and Team

3M is allocated to the strategic reserve

1M is allocated to the Private Sale

1M is allocated to the Airdrop and Charity

Roadmap

Q3 2023

Marketplace Development ends
Private Beta Version Launch on Testnet

Q4 2023

Public Beta Launch on Mainnet
Token Deployment and Initial Liquidity Supply
Cryptocurrency Airdrop/Giveaways
First phase of ONFT Airdrop

Q1 2024

Second Phase of ONFT Airdrop
Coinmarketcap listing for ONFT
Adding More Blockchains to the Marketplace
Marketplace Bug fixes and Stable Version Launch
Centralized Exchange Listing of ONFT

Q2 2024

Decreasing Token Fee/Tax
Security Audit and Trustwallet Listing for ONFT
Centralized Exchange Listing of ONFT
More ONFT listings and project partnerships
